

Sustainability Consultant, Level 1 or Level 2 - Denver

Ambient Energy is seeking an experienced Sustainability Consultant (SC) to support our sustainability services in Denver and San Francisco offices, out of our Denver office. If you fit this job description, please apply today!

- **Motivated**...by Ambient Energy's vision to improve the social and environmental impact of buildings by consulting for healthy, sustainable buildings.
- **Innovative**...providing continual improvements that save time and energy.
- **Technical**...has industry experience to get off the ground with little instruction, ability to grow into a Level 2 or Senior Sustainability Consultant; knowledgeable about building design, construction and operations.
- **Organized**...has experience and skills; is detailed oriented.

Job Description

This position entails preparing and leading sustainable design charrettes, providing realistic and innovative sustainability consulting during building design, construction, and operations, planning and facilitating project coordination meetings and construction site observations, conducting drawing and specification reviews, completing sustainability related submittal reviews, conducting green materials research, coordination with project teams and certification organizations (e.g. USGBC, GBCI, ILFI, IWBI, CHFA, etc.), and researching and implementing all aspects of green building rating certification programs. A Sustainability Consultant Level 2 candidate will also assist in development and presentation of marketing related lunch and learns or conference presentations as needed and may be involved in business development efforts.

Candidates should have experience with LEED projects and other green building rating systems and have excellent communication skills (including public speaking), ability to multitask multiple project deadlines without much supervision, passion for innovative sustainability strategies, and desire to be part of a collaborative work environment. Candidates applying for the Sustainability Consultant Level 2 position should be able to conduct all tasks listed above with minimal supervision and will assist in supervising and reviewing the work of Sustainability Consultant Level I and advise on project work as necessary.

Minimum Requirements

- Bachelor's Degree in sustainability or design/construction related field, MS preferred.
- LEED AP with specialty required (BD+C, O+M, ID+C).
- Minimum of two years of professional experience in sustainability/LEED consulting.
- Experience facilitating sustainable design charrettes.
- Preferred experience: Resilient/regenerative design, zero net water/waste planning, developing sustainable management plans, and/or organizational change management.

Salary Range

Annual salary range is between \$60,000-\$75,000.
